

Dietary Supplements & Botanical Testing

Certified Laboratories offers full-service ISO 17025 accredited laboratories with industry leading TAT and expertise testing unique dietary components and botanicals to support your quality and compliance needs. Our cGMP/GLP testing facilities offer a wide array of instrumentation and monograph solutions to meet demanding Federal and industry requirements. Contact us now to help ensure quality and compliance for your products.

Testing Services

We support your testing needs to meet Federal Regulation 21 CFR 111 for Identity, Purity, Strength, and Composition. We also provide international GFSI compliance support to assist your food fraud mitigation plan and protect against economically motivated adulteration, counterfeiting, and gray market products.
